Dear Sir William Dawson

I am glad to get another letter from you & to learn, that although it may be later than you thought, we may yet look for another book from you when you have time to put your materials together. "The Making of the Earth" would be a good title!

With reference to "Modern Science in Bible Lands" I am sorry to say we have about 550 left of the Edition. The fact of the volume growing beyond the size of a Seven and Sixpence book, has stood in the way,

of Sales, but in the Autumn we  
may do well to offer the Book  
at the same price as the others  
or advertise it somewhat extensively  
so as to reduce the stock. When  
we have accomplished this, you  
may like perhaps to issue a  
smaller book based upon the  
larger with additional facts?

With kind regards

I Believe me

Your Sincerely

M. H. Dodder

Sir William Dawson F.R.S.
