KING'S ROAD,

CHELSEA, LONDON,

Since I start off my last note with proofs of
Peters & I find that Delgado is mentioned
in the paper; but as his bibliographic notes are
very full & Dr. Milobiter, I have ventured to mention
them for you. Also I have inserted references for
Nicholson's Planolites & Saller's Arenicolites, as they
are not well known to outsiders. What is the
locality of Buttobrecht's graptolites from the Niagara Form?
Is it Canada or State of New York?

To save time, I am pushing on
the paper, for I have to make
the Index of the Volume, as it comes
out in the November No., with the
Donation list &c, causing much
printing preceding &c.

Trusting you are quite
well. I am yours very truly
W. D. D. M.
I ought to have said that the Blacky came
all right. I will attend to you
