

23 Deanning Road No  
Oct. 110. 1890

Dear Sir W. Dawson

Allow me to introduce  
to you a former student of  
University College, <sup>WEE BERRY,</sup> who,  
though his metier has been  
rather different, has always  
taken a strong interest  
in geology and once  
published some rock  
analyses. He has been  
obliged to give up work

for a time in England and  
would like while in Canada  
to see something of the  
geology of the country - I  
learn that I know he can  
have no better help than  
yourself and your museum,  
so I venture to give him  
this note of introduction -  
He has a good head on  
his shoulders and did  
well at the College

and his brother highly  
distinguished himself at  
Cambridge -

With kind remembrance

to Lady Dawson I am

Very truly yours

T. J. Bonney
