

Caldwood
Dec 19

Marine Biological Association of the United Kingdom.

THE LABORATORY,
CITADEL HILL,
PLYMOUTH,

1st Dec 1890.

Dear Sir

With reference to the communications I had with you as to my proposal to come out to Canada, I must again thank you for the trouble you took in the matter and state that since writing I have been fortunate enough to receive the post of Director to the laboratory from which I write. I consider myself very fortunate in having received the appointment, it ensures a position in the

scientific world of London
and gives me important work
to do in editing the Journal
of the Association and organ-
ising the work carried on
here.

I have also written to Hon.
Charles Tupper, withdrawing
my application there.

Yours sincerely
W. Calderwood.

Sir Wm. Dawson }
