

Helwan Egypt  
4 Jan 91

My dear Sir  
I have been much  
interested for some years in the  
geology of the Nile valley and  
of the desert to the east -  
and I am shortly going on  
a long expedition which  
will lead me all over  
the country between the

Researcher the like and  
between the lot of Assint  
and Assinon. I have  
been reading up the  
country very carefully  
before starting and  
find there is very much  
that is interesting and  
I have studied

Concerning the geology

I got Professor Hull's last  
paper and from that

branched off in many  
directions and have

come to have your

paper in the geol way

of 84 - On this Mr Topley

says "I longer should

write to Dr W. Dawson

who has probably copies  
of his paper"

May I beg you if you have  
a copy to spare to send  
me one —

Ernest  
A. Coyne

I will not offer to send you  
any of my papers in  
return — But after 4  
months in the Eastern  
Desert I should be able  
to write something that  
will interest you

Yours faithfully  
Ernest A. Coyne
