(Sir Wm Dawson)

Apr 13/91

My dear Sir,

I beg to thank  
you for your interesting &  
valuable papers, and  
to enclose receipt from  
our Librarian for  
the duplicates you  
so kindly added.  
I shall not forget  
to send you anything  
I may publish, & trust  
I sincerely think I shall  
see Dr. G. Jenkins.

do more in Eastern  
work till a new  
edition is required  
of "Modern Science  
in Bible Lands".  
For this I am  
collecting material  
and shall hope  
I make it a  
more useful repository  
of geological and  
other facts bearing

on biblical questions,  
and my wish in this  
direction tends to place  
the bible writers far  
in advance of their  
modern critics &  
anatomists, who are  
for the most part  
probably weak on the  
natural science side,  
and when not this,  
seem to lose all scientific

Rabbits of thought when  
they enter on these  
questions.

Believe me, with  
sincere regard,

Yours truly

Madame

P.S. I am surprised that any  
doubt should exist as to the  
Saurian type of the Hyksos. They  
are like American Indians. See  
"Modern Science in Bible Lands"  
p. 35-2. But their more old Anasite  
& other ancient <sup>ancient</sup> Palestinian tribes  
were Saurian. <sup>according to Egyptian historians</sup> Hannibali's head is  
the Capua but has more Saurian  
features. So have Strucian heads  
and I suppose the Pelagians were Saurian.
