DARENT-HULME,  
SHOREHAM,  
SEVENOAKS.

Dear Mr Dawson,  
Many thanks for  
your kind letter. Recent  
observations both in  
America & England  
must and I think  
in convincing geologists  
that the glacial period  
is not so far distant  
from our own. I am

now engaged on a  
paper showing the  
Siberian origin which  
I have suggested  
for the S. of England  
extended probably  
through Western Europe  
a part of the Mediterranean.  
I think I may connect  
it with the tradition  
of the Flood. There is  
some curious evidence  
in France, & Scotland

a Doulton - Can you  
kindly tell me  
whether in your  
researches in Egypt  
you ever met with  
any spheroidal forms,  
or with breccia like  
the rubble-drift I  
described in England.  
There are good instances  
of it in Greece.  
Thanks for the  
copy of your notes

which I have seen?  
From the Victoria  
Inst: Hoping you  
are well I am  
Very truly yours  
Joseph Frostwick

McGILL UNIVERSITY ARCHIVES
ACC. NO. 1463
REF. 128

In the various papers  
in Egypt to which I  
have referred I cannot  
find that this form of  
script exists.
