

McGill Col
Muntl

Dec 11/93

Dear Dr Spencer,

I have viewed
yours of 5th, and
enclosed. I am glad
to hear of your good
work at Niagara.
I hope however you
will remember the
complexity of the
problem. What becomes
of the pre-glacial channel
leading off from the
Whirlpool?
As to the Polar

expedition, it is a
great venture, and
I should give you
valuable results. I
fear however I cannot
set any substantial
aid for it here. I
shall consult friends on
the subject and see.

I shall send with
this the new edition
of my Pleistocene notes,
just out, which may
perhaps afford some
hints?

I am to try, if health
permits, to go to the
~~meeting of the Socy.~~
Soc'y, at Boston, at
the end of this
month (27th & following
days). I see they
have some general
purpos announced.
Will you be there?

Yours sincerely

Wm Dawson
