Geological and Natural History Survey.

124 State St.,  
Minneapolis, Minn., Dec. 16, 1893.

My dear Sir William Dawson: -

Please accept my most grateful thanks for the copy of your "Canadian Ice Age," sent by way of Prof. Fairchild, Secretary, Geol. Society of A., which I received a few days ago. I have read it with great interest, but, as you will believe, differ in some interpretations. But I think that both your observations and extensive list of fossils in the Pleistocene beds, and also your theoretic views, are most valuable contributions to our now vast glacial literature. I have much pleasure in seeing your complimentary use of my name, with those of Dana, Chamberlin, and Wright, for parts of the old Pleistocene sea above North America; only I suspect that it was a mer de glace. - My two papers for G. S. A. I send to Secretary Fairchild; cannot come to this meeting; but wish you a most useful session.

Very respectfully yours,  
Warren Upham.
