

Dana
Dec/93

My dear Sir William

I received some
days since your work
on the Geology in North America.
Being disabled as far as
headwork is concerned I
have not yet gone over
it, but hope before long.

The printing of my Geology
goes slowly forward and
is now about half finished.
But in my present state
proof-reading is a great tax
although I have help from
two others in the work - one of
them our Paleontologist,
Prof. C. S. Becher. - My

disabilities made it
impossible for me to be
present at the meeting of
the Geological Society in
Boston.

Thanking you much
for the copy of your work
I remain

Faithfully yours

James W. Dana

New Haven, Dec. 30. 1893
