

THE UNIVERSITY.  
GLASGOW.

February 7. 1894.

Dear Sir William.

I have received your letter of Jan. 25, and in answer I shall certainly do what I can to promote the effort to induce the British Admiralty to take part in the work of observing the tides and currents in the Gulf and River St. Lawrence. I am very glad to hear that you are doing so much in Canada for so very valuable an object, and I certainly think our Admiralty will see the importance of it and I hope they may be induced to join in it.

Lady Kelvin joins me in thanking you for your good wishes for 1894 and in kind regards to you and Lady Dawson. Yours very truly Kelvin
