

New Glasgow

7th May 1894.

Dear Sir William

I received your note and  
am obliged by the trouble you have  
taken

I send you the whole three numbers  
of Proceedings of N.S. Inst. of Science  
containing Mr Donald's papers, as matters  
are a good deal mixed up in them  
since he wrote the West end light had had  
again to be removed and in 1886 was  
rebuilt about 2 miles further east.

I have never heard of any person  
digging to any depth in the sand  
some parties took out a license

to search for minerals on the island  
but I never heard that they did any  
thing. As few as those at work have  
gone down, which is not very far, they  
have found only sand.

I will probably be in Montreal  
on my way to Ottawa next week  
leaving here about the 17th so that  
probably you may as well retain  
any notes you make on the subject  
till we meet

Sincerely Yours  
George Patterson
