Dear Sir William

I found  
the book Lady Dawson  
mentioned in her letter  
awaiting me here. Thank  
- you so very much for  
it - I am very glad to  
possess it only I want  
you kindly to send me  
a paper with your name

*over*

and mine thereon that I  
may fasten it on the  
fly-leaf. I read a good  
deal of it when it came out  
in the Expositor and shall  
enjoy reading it again com-  
-pleted and connected for  
periodical reading is always  
more or less unsatisfactory  
reading.

Miss Brodrick of the British  
Museum was down here  
before Christmas and gave

Three most interesting  
lectures on Egypt.

Mrs Hope Ashin & I exchanged  
greetings at Christmas  
time and she has promised  
to let me know if you & Lady  
Dawson come over in the  
Summer.

Baurich returned to school  
today - He is taller than  
I am now and has not  
grown ugly yet. Ophelia,  
too, is a very fine and

very intelligent girl  
Barwick still means to be  
an Engineer and seems to  
think the Royal Engineers  
the best way of carrying out  
his intention!

The year has opened in a  
very troubled manner  
but I cannot believe in  
war with the United States  
and the German Emperor  
strikes me as a little mad!

With renewed thanks to  
yourself & to Lady Dawson  
for her letter Believe me  
Yours very sincerely  
Wm Lubbock
