NEW YORK, Feb. 20, '96.

Sir J. W. Dawson, LL.D.,

McGill University, Montreal, Canada.

Dear Sir;

In this age of strenuous discussion of great Biblical and doctrinal subjects, we desire to give to the many thousands of ministers, who are readers of the Homiletic Review, the benefit of the best thought, and argument on these great subjects, in digested, condensed and summarized form. We are accordingly soliciting contributions, which shall embody their best thoughts, from many of the ablest of the recognized leaders and authorities in this department acknowledged to be so fundamentally important. You will confer a favor upon us and upon our very large constituency, if you will furnish us, at an early day, an article on the following topic, which we know to be in your special line: *I.* 'The Course of Geological Thought and Science in Connection with the Biblical Account of the Deluge.' *II.* *Scientific Confirmation of Scriptures.*

The articles should not exceed 2,500 to 3,000 words each. When the matter is made available you will receive our usual compensation for the best solicited material, viz.: \$25.00.

We shall also be glad to receive from your pen during the present year one or two more articles, at the same rates, on such phases of scientific thought or tendency as you may deem timely and calculated to aid our preachers.

Begging to assure you that your past contributions to our REVIEW have been both acceptable and profitable to our readers, and trusting that we may receive an article from your pen at a very early day, we remain,

Yours very sincerely,

Editors Homiletic Review.
