EDITORIAL ROOMS OF THE HOMILETIC REVIEW.

New York, Oct. 23, 1896.

Sir John William Dawson, LL. D., F. R. S., Etc.,

293 University St., Montreal, Canada.

Dear Doctor:-

Your kind letter with the "address" has been received. We are glad that you are making progress along the line of the article suggested some time since. Should any topic occur to you as needing to be specially treated for the ministry at any time, we trust that you will advise us.

Some time since, I asked Rev. Dr. E. F. Burr, author of "Ecce Coelum", and many other works, to prepare for us an article going to show that all the scientists have not been atheists, as some of our good friends would have ~~not~~ believe~~d~~. Possibly you might be able to give us another article in the same line, but from a more strictly scientific point of view and judged by the standards of exact ~~science~~^{science}. I think that such an article from your pen would not be likely to run at all in the same lines with the article of Dr. Burr. What think you?

Yours very sincerely,

D. S. Gregory,

Managing Editor.

P. S. We hope to print your Address soon. The "Twenty-
tenth Century's Ball" has attracted a good deal of attention.
Yours truly,
D. S. G.

Dear Doctor:-

Your kind letter with the address has been received.
We are glad that you are making progress along the line of the
investigation suggested some time since. Should any definite occur to
you leading to be especially treated for the Ministry at any
time, please let us know so that we may be able to advise you.
