

28 Darrocher St.

Oct 30 1896

Dear Sir William Dawson

The microscopical Society  
of which I am president  
have decided to try to  
extend their usefulness.

- & give in addition to  
the society demonstrations,  
four <sup>semi</sup> public meetings open  
to the upper high school  
forums and the Normal  
School -

The Society would  
feel it a great honour  
if you could see your  
way to favouring  
them with anything  
in the line of mineralogy

- we have a lantern  
microscope. which  
much simplifies the  
demonstrating-

If you should  
feel able to do it, any Monday  
evening you would  
appoint during the  
winter would be acceptable  
to us-

Our meetings are  
as you may know held  
on the second Monday  
of each month.

Hoping you will pardon  
the liberty I have taken  
in troubling you thus  
I am with kind regards

Very faithfully  
Yrs  
W. H. Stirling
