My dear Sir William,

The Diocesan Theological College Authorities are contemplating the publication of the proceedings at the opening in pamphlet form and they would like to have the admirable, and to them, very gratifying address that you made, more full than our reporter took it that day. Did you speak from notes and might I ask you if you did to allow me the use of them that I might extend what you said to greater length than it appeared in the original report which we printed in The Gazette. If you had prepared anything beforehand perhaps you would not mind lending me those notes.

Yours truly,

Richard White
