Jan. 1st 1897.

Sir J. W. Dawson.

Your Sir

Allow me to wish you a happy New Year and to express the hope that you will be spared to see many more happy days.

Many thanks for your paper on the Cambrian fossils which I have read with much interest. I trust you will not think it was with a view to injure the cause of Eozoon that I expressed the views I did in the paper I forwarded you by this mail. My efforts to display Eozoon to the very best advantage must be well known to you.

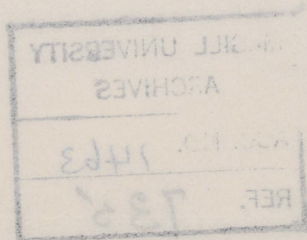

I spent more than one month preparing the Eozoon exhibit for the Chicago Exposition, and if what I heard was true more attention was paid to Eozoon than to the Silurian fossils. Should I ever be called on to represent Eozoon again I shall do my very

went to show it up in the
very best way possible
Among my microscopic
slides I have two or three
sections of Eozoon, one, at
any rate I think is worth re-
producing, now that you
are having Contour slides
made. These I shall be
glad to give you if you will
accept of them.

Yours sincerely

Thos Weston

Sir J. W. Dawson
