

W. H. H. H.  
The 1911

4, ST MARGARET'S TERRACE,  
CHELTENHAM.

March 31<sup>st</sup> 1897,

Dear Sir William Dawson,

I write to thank  
you very much for so  
kindly sending me a copy  
of your book "Relics of  
Primæval Life."

You have given an  
admirable resumé of what  
we know of Primæval Life,  
and you have done it in  
a way that makes the

2 MARGARETS TERRACE  
CHELTENHAM

interesting to the average  
reader,

I shall also value the  
book because it was  
presented by the author.

The illustrations are excellent.

I hope you received  
the slides I sent you.  
I should like to know  
what you think of them.

I have examined the small  
piece of rock you sent  
me.

The objects contained are  
true Gerrisella, and the  
small concretions are true  
oolitic granules formed by  
this organism. They are  
not sponges.

I regret that I shall  
not be at the Toronto  
meeting of the British  
Association. I see that  
your son is to be the

President of the Geological  
Section. Doubtless he will  
give a good address.

Again Thanking you  
for the book, which I  
have read with much  
interest.

Believe me,

Yours very truly

E. B. Weathered
