Sir William Dawson,

Dear Sir,

We have made a good start at our deep well and hope the matter will end successfully. Twenty dollars have already been expended and I hope the amount available for the work will reach you before long. I am not sure whether I mentioned in my last letter that I had written for blank forms of application for the grant immediately after receiving your letter.

I am desirous of getting as complete a set of photographs or other pictures of our older geologists as possible for our Geological Department, and therefore

Coleman.

take the liberty of asking you, as one
of our most honored geologists, to tell
me where I can get a good portrait
of yourself. I should also be glad
of any information regarding photos
or engravings of ^{Sir W.} Logan and his
assistants.

Hoping that you are well and
that I am not troubling you too
much with my requests

Yours very respectfully
A. P. Coleman
