Oct 22 1899

My dear Sir Mr Dawson

I was very pleased to
get your letter of the 7th inst
which brought back to me
kindly the very pleasant
time we had together
in Cray - I thought the
Boulder would interest you
as you saw the hitched
foss which it came through
was much deeper - I had
sent a copy to your son

Dr Geo Dawson Thank
you for your good wishes:
as regards Pleistocene Geology
I have a paper in hand
~~on~~ a Contribution to Post
Glacial Geology - giving
the Foraminiferal fauna
of the blue clay underlying
the Christine Rock & Forest
Bed it is very rich - We
all sympathize with you
in your affliction & our
family join in the heartiest
good wishes for your welfare
& happiness - I am true

You have a good & useful
life to look back upon
& this is no mean accom-
plishment. As regards myself
I can get through so much
^{desirable} work as I used to do but
still I manage a fair
amount by continuing to
use a speaking phone with
"punching" - My firm is
very busy just now with
professional work & this
occupies me very much

Yours sincerely
Yours

T. Melland Reade
