

WRITE THE ADDRESS ON THIS SIDE-THE MESSAGE ON THE OTHER

Dr. J. W. Dawson
Principal, McGill College,
Montreal,
Quebec,
Canada.

My dear Sir; Ithaca, N. Y. Dec. 19.

Specimens are un-
packed. If I am here I
could get it done, and
suppose Mrs. H— would pay
that expense. The estimates
were what I thought value
to our University. There are
162 slabs of Orthis Billingsii,
but you may reduce the
price if you think best.
As to Acadian Corals,
of course I meant Acadian
Provinces, and my list
probably omitted the necessary
formation. I will have to
look to be certain, but think
they are Carboniferous. If
not, will notify you.
In haste. Truly yours,
Thos. B. Constock,

are my other
estimates high?
