

Monday A.M.

My Dear Sir

I enclose Mr
Matthews paper that you
may say what you wish me
to do with it. It is in-
teresting but any conclusions
founded on three catalogues
of plants collected in four
countries can hardly be
even approximately correct.

It seems too long to print
at length and yet it
would take considerable

labor to shorten it much;
the map is unnecessary.

Gives no trace
David A. P. Wall

Mr.

Matthew
Wap
