

McGILL UNIVERSITY ARCHIVES
ACC. NO. 2211122
REF. 51

London Nov 29 1869

Dear Papa,

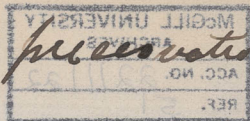

I did a few more of
the forams, last night, I was
working at the 35 fathoms ones.

It is a very rich collection, & some
very pretty ones indeed are in it.

I think I will be able to do
about one sample a week (packing)
& if the others arrive in time, perhaps
a good many in the Christmas holidays.

I don't remember whether I told
you or not, that there is a slab
in the Museum at Gernsey. It
from the English division, with
plants upon which would
certainly be called to *Psilophyton*
if from Gaspe. They are not

however in very good preservation.

I hope you had a very successful "Founders festival" and that it was graced by the prince's presence. I suppose I will have accounts of it in ten days or so. If the excitement & bustle was not so great as to prevent anyone from writing.

I am very much obliged for the weekly Witness which has come twice now, & for which I suppose you have subscribed for me. It is a very good way of getting up the news. I have seen telegrams in the papers here about some row at Red River. I hope that it will not amount to much, as it would be very awkward to deal with. Believe me with best love to all at home. Yours affectionately
George
