REF. 4

Dear Papa

Many thanks for your letter, ^{dated 7th} which I received last night & for the Bill of Exchange which it contained. I will attend to the payment of the various subscriptions at Somerset House as soon as I can.

I am getting on with the frames now, having nothing at present to occupy my evenings, I hope to have finished arranging them before the end of this month. The naming I think will not take so long.

You have not stated on the boxes what the character of the bottom

was. & I think that has a good deal of influence, especially on the prevalence of sandy forms. If you still know this please tell me about it.

I am going to mail your various notes on the way to the Laboratory this morning. I have altered the no on Sir C Lyell's letter, his right number is 73 Harley St. I think the numbers of the street have been changed.

I have now got on to the qualitative analyses of mixtures at the Laboratory & have a good deal of that kind of work before me. It is much more interesting however than what has gone before. I have not yet paid my fee for this quarter, but expect to have to do so soon.

Mamma says in her letter that Anna was still at Quebec, but meant to write either as an enclosure in yours, or separately. I have not yet heard from her, perhaps on account of her mistake about the address.

With best wishes to all,
Believe me your affectionate son
George Hudson
