

Anna &
W. W. W. W.
M. 1/10

Mr. Gill College
April 11th / 10

Dearest papa,

I enclose you
a letter which treats on some ge-
ological subject, it does not seem
to be very important - but as there
is room in this letter, I as I fo
could not decipher. The names of
the places the writer referred to
I thought it best to forward
it - I also received a letter

from Prof. Newberry, who wishes
to have your diagrams of coal
plants to illustrate a lecture he
intends to give, he does not seem
sure of success as he says he fears
you may have left - so I answered
that you had left, & I could
not send him the required diagrams
he has just returned from C. Geo.
& regrets that his absence preven-
ted him sending you some photo-
graphs of Devonian fossil plants
& also some specimens of Gilboa?
plants, he wished you to telegraph

to him if you had time to look
over them before you left.

I was a little surprised at
not hearing from you, but I have
concluded that you were hurried
on board without time either
to telegraph or write -

Everything is going on very
well, & we are having such
beautifully calm weather that
I trust your passage may be a
pleasant one

Yours very loving

Anne
