Jan 11. 702

Dear Paper-

I had intended to write more fully this mail but have lost the time, & take a minute from the Laboratory to write this.

I Enclose my account made up & balanced for last quarter as well as I can. I hope you will find it correct.

The mails this week being

Cate I have not yet
received my Lomé letters.

I have just finished Iron
in the Laboratory & am
beginning Copper. If you think
of any special kind of
assaying or analysis
likely to be useful please
let me know, as there is
considerable option in
the choice of work.

Prof Hally has knocked
himself up with too much
work & is off to Egypt for
6 weeks or so. postponing
our lectures.

With love to all
& our affectionate son
George

P.S. I find I have left "Nature"
at Halsey St, & fear I will not
be able to post it in time to
reach you this week.
