received for you, the enclosed about
your new book, seems to me the only
one worth forwarding to you. Another
from J. Thomas reports that you
have not acknowledged the money sent
in payment for your article on "Poetry",
supposes you are from home. I ask
you to address to the Care of A. J. Johnson.
11. Great Jones St. New York.

I think in my last I acknowledged
a letter from from Bangor. Today
both William & I had letters from
George & Rankine. The former were

unless we are quite satisfied
with it. He also offers a second
hand Carpenter range in perfect
order for \$40. but the water pipe coil,
building &c will bring it up about
\$90. The Toronto range with building
costs rather more. William & I have
been comparing the plates of these with
the ones we had from the States. The
workmanship of the latter appears superior
but wd for the size we require cost
\$110 or perhaps \$120. besides building.
I think it is too important to be really
a matter for me to decide without
your help. Just as we began dinner
today Prof. Murray came in. fortunately
we had enough to share it with him
He has come to make further preliminary

arrangements for coming down. I
 hope to leave again by six train. if not
 he is to return to tea.
 Mr Baynes took tea with us last night
 we had a long talk about the property.
 He is still very decided that the
 acquisition should be devoted to the workshop
 & talks very big about putting up College
 residences on the West side of the grounds
 handsome houses according to each
 man's plans & rent them to us at £80.
 I told him I hoped he wd get good
 security for the payment of the rents for two
years!! I think I must look sharp after
 the neck of ground at the top of University St
 they have begun to build a narrow house
 with broad frontage - at the end of Mrs
 Eschilus on the continuation of the same
 narrow strip of ground. It wd be a

written from here. I was gone on the
 31st. It was written on Sunday & he
 says he continues to enjoy himself very
 much but that he must return a
 day or two before Sunday. I trust that
 many days before you get this you
 have had a happy meeting with Tracy.
 I think it will be pleasant for him
 to return to Montreal when some of
 his & our friends are in town. I
 am glad you are away because it
 seems as if we were on the highway
 to another hot time. I have been
 at Promis about the stove. He showed
 me a new pattern, I want to make one,
 a good deal like the Carpenter range
 but requiring less building, which he
 has done for me to see & not to return

to please himself, for
