Sept-20. / 72

Dear Papa

Would you kindly
read the enclosed & forward it to
Prentiss. I do not know his
address. I am very sorry that
the dipping - about the line out
has arisen as it is one of the
areas most needing exploration.
The appearance of the lode is
now really worse than before we
did anything at it as further
unlaying the exposure has brought to
light a fault cutting the ore sharp

W

to the North, & now we cannot
do anything further in the way of
exploration. The lode no doubt
comes in again a little further
North, & I think from Boulders
even richer than where now seen,
but it ~~will~~^{must} be a work of time to
find its precise position under
so much drift now that the
clue is lost.

I received your & Anna's letters
this morning. I want to write
to Anna & - but must now
go to bed for an early start
tomorrow. The weather is fearfully
wet & ground saturated with
water. With love to all
Your affectionate son
Jesse.
