

George

GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn L.L.D., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

3
21 March 1883

Dear Father,

I have your thoughts
the notes you wrote to attach
to the descriptions of plants, &
return them by this mail. I wrote
out the first part anew, with
a few minor changes. Some notes
you had written on the margin of
your MS., I could not quite
understand & so you will have to
fill them in.

I find that one plate of the Louis

Plants has been prepared by Desharats process, & is ready to print if required. Dr J. seems quite willing to have it printed in the R.S. memoir.

I send the plate with the W.S. for your inspection, but please return it, as we have no duplicate

Your affectionate son

George

I am very much disgusted with the way survey matters go here & feel almost inclined to give the whole thing up. When they insisted on being the boss up here they should have made up their minds to put the officers on a better footing in regard to salary than lower grade clerks in the other departments.
