Little notes
June 25th

Dearest-papa, your kind note

to Eric, the Sunday mag., & child paper, have arrived as reminders of your ever kind thought of us - I can carry to hear that you find so many affairs to prevent your coming down to peace & quiet - we certainly have a wide country to ourselves no one interferes with our door knockers - or criticises our talents, or sends us invitations, & if mother's active mind c'd only have been lulled to rest, she might have found her Eldorado of rest - I have quite given up trying to do more for her than to make her labours as easy as possible, by delaying some french hireling with

see the young ones are all well & "happy"

any trouble about it - but if we are
collecting the reel in any case, I would like
you to hear her soon I worked - by the
way, if they are the present now as in
fall.

Eva seems to be having a pleasant
time, if we may judge by her letter
seems to be free for letters writing. I have
had two letters from B - one fr. F. post
I one from the Rabes where he is at the
Army Camp, really enough he found the
Cross finally sent - and the thing for that
marlous there to meet the profits - so he
assured her again of the girls in their journey
I am glad he did not go mixed to know
as he will now be more likely to see
Newbie there - photos are splended, the
but things of the kind I see since

any trouble about it - but if you can

doubtful lingo, or hunting up eggs, or interviewing the neighbourhood generally - Florence enjoys the "douce far niente" to perfection however, & admiresmetis in all its phases -

We have had no end of salmon this year, wh we hope may continue till you come - I enclose a bill that I wd be glad if you wd pay, & remimber I have received from the Bergelund Society a very exact & business like body - I only hope they make a good use of the money so rigidly exacted from every old student - who has not sat under its shadow.

The beguendos we brought or rather sent down, are doing remarkably well, & if they prove equal to the winter will be a great addition to our plantations by the way the seed of hymenid I promised to Mrs Alfred Baynes - address Compton P. D. - don't put yourself to

All the young ones are well & "hopeful"
begin to creep, & can run full kindly
on his feet, wth. though you may not be
strong alike to the fact is a triumph deare
told - in a way of just - 7 months of growth
all relations are repeated to take a year
made in the same - But is more active
than ever. we have learned to be surprised
at any of her feet. It is charming to see her
go head over heels & then pick herself up &
say in a breathless way, "nearly 200 pounds
over, more -" I am giving 250 & 300 lbs
daily lesson hours. wh is so pleasant that
neglect - more than ever, having to give up the
teaching to others - It is a matter of conscience
wth me to see how much learning
I have little consequence - culture at intelligible
can be just - with a chapel - But when I can
get a feeling in honor I stand - know where to stop - the
of all as high over it - wh is the usual amount - how many
with the best time since
