

Ranunc
July 90

Tuesday

My dear Father,

Many thanks
for your note, - 22nd ult, -
with news & kind
wishes.

Please thank Eric for
a letter from him, rec^d
at same time.

I am glad to hear that
Metis is quiet & not
overcrowded, and that
weather has been fine.

2) I have seen something of Florence, as Mother will have told you, but have not yet had an opportunity of visiting Eva in her new home.

Yesterday I called on Moody, Sec^y of the C. P. R. here, and had a talk with him. He expressed a desire to have copy or copies of some of George's results in B. C. which he says would interest him

personally, & which he
thinks he can utilize.

I mentioned the short
report issued last year
on mineral resources,
which if you remember
I reviewed; assured
him that G. would be
glad to let him have
copies, & promised to
mention the matter.

If you have not copies
yourself you might
enclose this line to George.

Address: - Harry Moody Esq
Sec^y C.P.R. 88 Cannon St.
London -

Whilst there I examined the model of one of their new ships, in itself a pretty piece of work, and representing a fine steamer of the first class, well equipped & handsomely fitted. They have also been getting out recently some particularly large, fine photos for exhibition in hotels &c. amongst others one in which your name figures conspicuously as applied to one of the Mountain Ranges -

I am -able to
leave London, yet
a while, but hope
to have my little
business affairs
arranged by the
end of this month.

Remember me
most kindly to all.
Love to Anna & the
children, with an
especial portion for
Mother, to whom I shall
write again shortly.

I have met Bunton
editor of the Contemporary,
once or twice, and
endeavoured to make
a more or less favourable
impression.

D^r Rae & Redpath
I see occasionally.

They say there are nearly
300 people in London this
summer, from Toronto
alone.

All good wishes,

Your affectionate Son
Rankine.
