My dear Foster,

I have received a number of extra copies, at least, of my short paper in American Geologist, of which I enclose half a dozen.

This is really an abstract or extract from a portion of the glacial part of my R.S.C. paper, & as the complete paper is now likely to be ready before long I scarcely know whether it is worth distributing thus separately. You might let me know what you think about this. If you send any to friends you might let me have a memo. of the names. If Bowley receives one he might (from his letter) very possibly take it for my paper to which you would have referred in writing of him.

Yours
Selwyn
