

S. M. D.

Ottawa

May 195 - May 8. 95

My dear Father,

Since writing
last night I have received some
two notes written yesterday
& one also from Mother.
I don't think I should attach
much importance to the
plans got by Bowman, for
if really from Bellingham
they should correspond
with some of the Canon
forms found there, which
from what you say I judge
not to be the case. Besides
I have an indistinct remembrance

That Bowman told we
 got them from some third
 party & a faint suspicion,
 that although called Selling
 B., they may really have
 come from Seattle, further
 South in Puget Sound.

That they came from somewhere
 in that region is of course
 certain & it is highly probable
 that they represent some low
 part of the Puget group.

I don't think the prospect of
 getting by quite somewhere
 South of the Glacier would
 be enticing enough to induce
 boring there at present. If it

Could have been got
at Vancouver, it would
have been different. To
carry it anywhere would
make it cost more than
good Hawaiian Coal.

I hope that you will induce
Mother to go to Quebec
with you, & make a
sort of outing of it. When
you return you may be
able to wake up your
mind about coming to
the R.S.C. meeting here.

4

which you should certainly
but attempt unless you feel
quite able for it.

Yours
Scye.
