

GEOLOGICAL SURVEY OF CANADA,
George M. Dawson, C.M.G., LL.D., F.R.S.,

DEPUTY HEAD AND DIRECTOR,

MUSEUM AND OFFICES, SUSSEX STREET, OTTAWA.

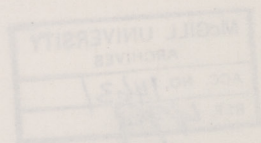

Oct. 7 1895

My dear Father,

I have seen of Saturday &
think you should hold the frog bits you
have a chance of seeing the new lot of
plants from Burrard Inlet. It will
not make any particular difference in
delay considering how long they have been
getting the water in type of vials.
I will have the plants packed up &
sent down to you today if possible or
at any rate tomorrow.

Rept Jones sent me a copy of the paper
ordered of you today. I therefore return
you copy. Hope that everyone in Montreal
is well

Yours
George.
