My dear Fuller,

I return the American  
Geologist which you sent today.  
I had not sent it to you -  
probably one of the Editors may  
have done so. There may be  
something more in it that  
may interest you.

I have replied to the British  
Guiana gentleman. I think  
we can send him a collection  
of minerals such as his  
circular asks for without

Much trouble.

I may very possibly run  
down tomorrow afternoon,  
for the sake of putting in an  
appearance at the Mining  
Association meeting.

Yours  
George
