Friday, Jun 22. 97

My dear Father,

I fear I shall
not be able to get to Montreal
tomorrow - Circumstances
seem to be against it - that is
to say there is a lot of paper &
such stuff piling up which I
wish to get word off. The
Summary Report for last year is
going through the press & I
do not like to delay it more
than possible. Last night I
had to participate in a meeting

about expectations etc & tomorrow
I fear I must assist at
a dinner.

We have at last a good looking
y snow & I hope you benefited
by the same fall of wintered. The
weather however again speaks of
heavy snow weather coming & I trust
that you will try to keep the
temperature well up in your
house. Plenty of warmth is
I feel one of the things which
are most necessary both for you
& mother. Thanks for the
Geol. Society's receipt, duly to

3

Send - also for copy of your paper
on the water sponges.

Yours
George.
