

G. M. D.

Feb/97

GEOLOGICAL SURVEY OF CANADA,
George M. Dawson, C.M.G., LL.D., F.R.S.,

DEPUTY HEAD AND DIRECTOR,

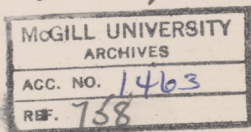

MUSEUM AND OFFICES, SUSSEX STREET, OTTAWA.

Feb 16. 1897

My dear Father,
I've called on Mr. Tott, with further reference to the vis. rocks duly received & contents noted, also the extract from Supplement to Canadian Geology, with additional obs. notes. His bill returns later, as requested. I think that we shall be able to get some sort of reasonable arrangement for wrapping, particularly with the aid of explanatory notes on

The Wagoner of the Wagon.
 I was very sorry to hear of your
 illness, although my news of
 it came when you had fairly
 recovered. It is certainly
 necessary to be very careful of
 your general health & particularly
 to avoid all undue fatigue.
 Be sure that we know if
 there is anything I can do
 to relieve you from trouble or
 work.

'Grip' is still very productive
 here, but I have fortunately
 escaped so far.

Yours
 George.

P.S. I find I have the key of your
 desk for left when you went to

Explained in the Spring. I
will bring it down next time
I go.
