

George ^{Left}
12 Aug ^{Kepe}
Ottawa

Dear Father,

Just this morn'g we
all slept yesterday at noon,
& I had the pleasure of
dining with her & the Gaults
at the Hotel yesterday evening.
I hope she will enjoy her
rent, though there is little
to see in Ottawa.

It will not be necessary
to send up any shells which
occur in the present bedding plants

from S. Serkolobewan etc
 as we have great quantities
 of shells from this set of
 rocks & those are only strays.

The shells are evidently Judith
R & my contention has
 been that the Judith River
 has been mis-called
 Laramie. I am, however,
 in all this bearing &
 what you say about the
 plants fossils I know that
 I am. If you look at
 the last report p 118 C
 you will see the matter
 discussed. Is there no

circumstances of plants from
this Fed (that of Mill Creek?)

I wrote a few days ago
asking what you know
about a man called
McEvoy who has been
applying for work & is I
believe a product of yours.

I remember hearing of
him from Bernard but
forget what he said
regarding his qualifications

a style.

Yours

George
