

(14)

I have however a little list of things to ask about which I hope may reach during the Xmas holidays. ~~As~~ If it comes to hand before please put it aside till that time.

With regard to the Collections. I do not think you mention in your letter whether the Tool. Collections in Alcohol, etc. Insects, & the Collections of shells & birds eggs were sent to Cameron. If not there should be something.

There is also a list of details & measurements in one or more of my note books, which should accompany the birds. I think I have the books to Anna. It requires to be copied. Please send it to me as I have plenty time to do it here.

I have just written to Prof H. Jones about his corrections of nomenclature of forams. I do not know whether the inaccuracy of the figures, which is considerable, may not account for some of the differences. In my horizontal slide box in a drawer of my bureau, there are several preparations of the Boyne R. Chalk. I should be glad if you can send Prof J. one of these (one worked Coarse will be best)

that at the time you were ordering  
 some French Micro. Apps. I added  
 an order for an objective (I think  
 No 7. or about equal to an English  $\frac{1}{6}$ )  
 If this comes please get Ross to  
 make an adaptor to seize English  
 thread & then send it on at  
 leisure. I have not yet used  
 my Micro. here at all.

With love to all at home,

Your affectionate Son  
 George

Mr. Dr. Carroll a Senator from this part  
 of the Dominion leaves here for Canada  
 tomorrow. He it was who was supposed to  
 look after the Centennial representation here,  
 & I have been waiting with him since. He is  
 one of your former graduates, & though a  
 queer sort of fellow is rather intelligent  
 when he deigns to talk sense. He  
 speaks of calling on you to see the  
 College &c.
