

Anna

Little Melis
July 21st

Dearest papa -

you will be
on the wing, I suppose when
this reaches you, & I hope you
will have a pleasant &
successful trip, you will
be in Winnipeg for some days
I suppose. Please give my
kindest-remembrances to the
Fartins & all love to Rankine
We shall be anxious to hear
all about him as he is so
little communicative on his
own account -

Edith found yesterday
the entire cast-skin of a snake
over three feet long, & quite
perfect. It was found in
& hid among loose stones,
showing the difficulty the
owner found in having it
Is it valuable as a specimen?
Calamities still occur at

metis - an unlucky french-
man chopped off a finger
& a half - at the hospital
& when Dr. Bliver came to re-
pair damages - he discovered
that Mrs. Frank's baby (who
had been unwell for several
days) had measles -

her nurse too has been
on the sick list - with a
kind of bilious attack -
but is well again - I fear
she fell a victim to eating
too many strawberries of
wh. we have had a very
unusual abundance

Bernard asks me to
inquire whether he will
send the rent - to William
on the 1st August, or to
Mrs. Byrnes pay it - to and
of salary before you leave
I - intended to have written
about it - before -

I trust - Eva & her
numerous packages arrived
safely we miss her much
Do leave orders that mamma

So sorry for a change - I am sure she

go away for a change - I can see the
need it, whatever the way very -
I enclose receipt - for taxes

here -
Very
Cypre Stenally
