

Dearest Papa, I am happy to say that hardly any letters come for you except mere inquiries about the college, there is one man who writes from California & wishes to study law here, is not that rather curious? I think I told you about Prof Newberry's request for your diagrams, Dr Hunt came up the other morning to see if they could be sent, but I told him that I knew nothing about them, & rather

imagined that you had taken
them with you. Prof. Cornish was
in today I desired his kind regards
(or something equivalent thereto) to be
sent to you, the results of the ex-
aminations were announced today, Johnston
has the Prince of Wales medal, ^{McIntosh}
the Shakespeare, I was very sorry
to be able to go to the last debate
which I am sure must have been
nice. From the names down, the
subject was whether or not the growth
of modern civilization was conducive
to the production of ^{the} imaginative works.

I regret that Brause has proved
unworthy of his trust I has not sent
up the register yet I have been down
about it several times but failed to see the other
views Brause himself so I wrote him a
savage note yesterday I hope it will have
the desired effect of your loving daughter.
