

Dear Uncle

I was very to

Learn by Georges letter that you had
been poorly but trust that you
still continue to improve in
health and that soon as the fine
(Breeding Autumn winds here
come on you will gain
health for the winter We
have been all very well
and had the prospects of
paying a visit to Picton but
have been prevented doing so
as yet but have not given up
all prospects of doing so if the
weather permits John has been
somewhat more hurried on
account of Mrs. Casper's illness he
has been in Liverpool for the
past two months but has been
confined to the Hotel for the
greater part of the time under the
Doctors care his health by last
Mail is a little better and he has talked
of taking a trip on to the
South of France for a couple of months

as the air of Liverpool does not seem
to affect him favourably. John
will be very busy after the vessel is
launched getting ready for sea and
is then talking of going on to
Pictou after she is away if the
weather will permit. The tides
are looking rather dull in Liverpool
but I think our folks will be
able to clear their hands with
the ship and perhaps go on out
quite as soon as they see how
things ^{turn} or brighten again. They have
been busy getting in a large supply of
Timber from saw about 7000 Pounds
worth they had first six thousand
Pounds and are now getting in more
as they do not wish to be out of
Material whatever turns up

John joins me in love
and best wishes to you
and William and Mrs Secor
if we go on to Pictou we
will go in a few weeks we will
send a Paper on to you after
the ship is launched
I remain yours very sincerely
Stables
