

Noble

Alderhot Camp
13th June

My dearest Mrs Dawson

I feel quite ashamed
that I sent off my last letter
to you without even acknow-
-ledging the pamphlet Dr
Dawson so kindly sent me
with the sketch of his
Lecture - it was so kind
& thoughtful of him. It
is a great pleasure to read
it again & try to understand
some of it. It makes me

look forward to the time
when all God's works
will be fully opened up
to us, & we shall have
capacities to understand
them, both their nature
& design. I see ^{in them} the beauty
of His wisdom & glory -
One or two copies of this
Pamphlet were sent to him
before, but as there were
infidel views in it, he
w'd not take it. - So I am

very glad that science
numbers some Christians
among its teachers. They
ought to write for the
public as much as
possible. So as to counter-
act the influence of the
others - I hope you were
not offended at my last
letter & did not think
I was taking a liberty in
acting as I did - have

You settled yr plans as yet,
as to returning with Dr Lawson
or not. I wish I cd think
I had a chance of seeing
you again. - One of Kelly's pieces
went last week with us she
returned with her to Reading
& returned on Sat. - We
did not hear of poor Emily
Crawford's death in Shinty-
island. - I was let in after
her confinement & Medic
on the 9th day - how sad

For him left with 3 or 4
little children, he had to get
a friend to write to tell his
friends. he was quite unfit
himself poor fellow -

How much we have to be thankful
for with regard to those ^{European} ~~European~~
Sits happening just now
when they are agitating the
question of the Profs. have
shown Judge they will
leave in Canada -

with kindest regards
from both ^{W. & J. Lawton} ourselves
to yourself ever yr. very

affectionate friend

Wm. Lawton
