

G. M. D.  
June 15

London June 15<sup>th</sup>  
1870

Dear Mamma

I have not time to  
write but enclose you the Canadian  
letters which have just arrived,  
It is horridly hot here now & the  
leaves are quite brown & like small  
scharas. I am getting quite  
discouraged about the examinations  
I get on so slowly with work  
especially in this hot weather which  
makes one so horridly stupid.

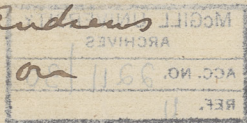

The Chemistry exams take place on  
the 29 & 30 of this month.

Please tell Papa that I this  
morning remitted to Temples Co D

& also to Sampson Low & Son.

Temple's receipt has arrived  
& Sampson's bill has come back  
not receipted. If I hear no  
further by the evening I will write  
to know how it has happened.

I have looked at Mr. Andrews  
on the School Map it is on

Coal heavy, Carboniferous <sup>has</sup>  
Old Red & a deposit of trap from  
10 to 14 miles to the N.

With very best love believe me  
Your affectionate son

Geo. H.

Please give my love to Papa & also  
to Aunt Uncle & Cousins.

P.S. Three Copies of Archaea  
have arrived from Sampson Low.

Geo. H.
