Series 184

Alexander St.
28th Aug. 1884

Dear Lady Darnson

I delight in the privilege
of thus addressing you this morning, and
saying that the Governor General's words last
night has quieted all our anxieties; and we
can never forget the unanimous expression
of satisfaction, given by the British Scientific
association, the leading citizens of Montreal,
and representatives from other parts of the
Dominion.

May your life and that of your
worthy husband be long spared to promote
scientific education, (on a religious basis)
and more fully establish secular
Education.

With kindest regards
J. Ferrier
