Acc. 1443

Dearest Mother,

We were delighted to hear that your ship had arrived in safety & we have been pleasing ourselves by imagining a triumphant arrival at yr destination - though we hear very bad accounts of the presence of Grip in Liverpool - I trust you & all concerned will escape - Here we are again having an increase of it - my little Lois has just had a very severe attack temperature up to 104 - I've break in the fever for 48 hrs. Brown was most attentive coming to see her twice a day - always with that air of supreme leisure, that is such a wonder to see - The little patient is better now & grows weak & will want watching

which changeable weather
makes difficult - Tooley Victoria
is slain with a similar
attack, but seems brighter
tonight so I trust it may pass
soon -

I have a new nurse who
is said to have many interesting
qualities, but is warranted
to be extra slow, but as no
other occurred - I am writing
through the first week with
her Kate being housemaid
Esther's clerical notes are coming
to her - so I cannot have them
far when I am ready - All
to my great surprise Miss
Pickel wrote me a note saying
that her mother much wished
our company this summer &
she had decided not to go to
Metis - she has suggested a
substitute who I still have
to hunt up - of course I
shall scarcely hope to find her
a paragon, but we shall see
also as all signs point in a
dry time my washerwomen &
the tailors at Metis have
vanished - & we shall have
to start de novo - all round
naturally I have not
been able to collect much money
under the circumstances - much

surprise has been expressed at - 21. several
convinced - 5 - but Anna the Dr. being up a
Friday morning & very late, I said his work
had indicated something better. - I've seen the
report - of the conversation in the Gazette, an
which we should agree with me as to the
importance of paper speaking on that line. I
who was there to take his report - was
never all - it - I did my best to cover it -
hears not - mentioned the matter in a paper
seems well & benign - I was tonight - I
saw it - I was in his church his new
I - it - is quite a space - I have not - been
it - all yet - only has been a little
but - nothing I account -
though I said in now show him to
mind - his husband's counsel - the doctor &
to his school - through his health -
Also was in London for a few days - I
was busy at ~~the~~ that we have heard to

shall hope to visit something more
amusing later - by the way I was at the
Lecture on 21 - Mrs. Esther Sherman, 100 at
New Street - Mrs. Kinnear has been con-
sulted with by the committee and I have not been
able to ask for her -
Wells Nov 5 1840

for a remedy -

Respectfully

Anna
