

Nov. 6. 91.

My dear Master,

I have just had
a telegram from Sir George
telling that he leaves Washington
tomorrow morning for Ottawa,
but proposes staying a couple of
days in Montreal en route.
I notify you of this because
you spoke of wishing to see him,
but do not think that you are
especially called on to go out
of your way to show him any
attention, nor that anything will
come of your doing so. Probably
he may call or be expressed an

intention of doing before, &
 - I suppose he will be staying
 with his daughter Smith.

I hope that Father has managed to
 get rid of his cold by the
 natural ruggedness of his
 constitution, before this, as I know
 that his own case of it could
 hardly be expected to result so
 satisfactorily.

On Tuesday, after getting back
 here, I dined with Mr Dewdney,
 but otherwise have been undisturbed
 except by the innumerable small
 interruptions, including Father's
 friend Barn & Gier & two
 other Swedish geologists friends
 who turned up. All have gone

3

low, but De Geer &
Lundbaum are to return
from short excursions
which they have undertaken.
Both are very good fellows
& I wish I had more time to
give to them than I have

Yours

George

P.S. Froede would I think
be interested in seeing the
new physical apparatus
at the college, as he is of a
mechanical turn
