

Chauver  
Dec. 7. 91.

My dear mother,  
I send to you  
the results of my photog.  
Experiments taken in  
Montreal. Some of them  
are portraits but very  
scenes. One or two  
of the interiors are fair  
& one is good. The  
library & drawing room  
are so very dark &  
non actinic that it is  
very hard to make anything  
of them. You will notice

What anybody with the least  
 left about it - leaves out.

The plates of Annas &  
 Francis's Children are  
 failures from want of  
 light. I shall try again  
 some day with Sunlight  
 & I trust to get 5 more  
 now how to succeed  
 better with waterers.

If you like to send any  
 by three to Eva with my  
 Compliments I can get  
 wire prints. But I hope to  
 produce better ones after  
 another trial.
