McGILL UNIVERSITY ARCHIVES
ACC. NO. 1377/15/B
REF. 49

My dear Mother,

Your telegram received
today seems very satisfactory,
& I hope that father will
continue to improve satisfactorily,
& that he will himself help
this by remaining for the time
entirely under the doctors'
orders — and yours.

As to a sanitarium, my
only doubts respecting Jamaica
are about the voyage &
whether the climate is
sufficiently dry. If a very
dry climate is needed it

would not be suitable,
 though seasons of heavy rain
 are October & May. I
 found another book which
 gives some meteorological
 data where I have put a
 blank in it.

Bernard told me that
 Dr Wesley Mills had been
 some time in Behama
 Ids, & he might be able
 to tell you about
 Nassau if you think it
 worth while to enquire.

I have not heard anything
 was about the property.

3

business, but suffice
there is no hurry about
it.

Yours
Serge
